## **DETAILED ACTION**

### **Prosecution History**

1. Claims 1, 3, 4, 6, 8 and 9 have been amended.
2. Claims 1 - 9 are allowed.

### **Reasons for Allowance**

3. The following as an Examiner's statement of reasons for allowance:

Regarding Claim 1

The prior art of record neither anticipates nor fairly and reasonably teaches a device for assisting in the selection of a therapeutic tubular compression orthosis said device comprising:

- means (26) for establishing a first file containing data representative of the morphological characteristics of the limb (30), this first data file comprising the coordinates, in a three-dimensional space, of an array of points (68) distributed on the surface of the limb along a succession of contours (66) defined at different successive coordinates (Z) of that limb;
- means (10) for establishing a second file containing data representative of the dimensional and rheological characteristics of the orthosis defined at different successive coordinates (Z) of that orthosis and giving the elongation of the, orthosis resulting from the tension applied, to said orthosis;
- compression simulation means (48) able to calculate the compression pressure, at a plurality of points (68) of said array from data contained in the first and second file by

application of Laplace's law at the plurality of points, as a measure of compression pressure on the limb (30) by the orthosis (70) if applied over the limb; and

- means (50) for displaying said pressure values determined by the compression simulation means.

4. The most remarkable prior art of record is as follows:

- Flaud et al: U.S. Patent Number 6,499,356 B1
- Pomatto et al: U.S. Publication Number 2002/0010408 A1

5. The cited prior art of record fails to expressly teach a device for assisting in the selection of a therapeutic tubular compression orthosis, where the device calculates the compression pressure based on a three dimensional representation of a limb and data representative of the characteristics of the orthosis by applying Laplace's Law and displaying the pressure values.

6. Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance"
